

CUSTOMIZING GUIDE

1.5.7.2

CUSTOMIZING GUIDE

HOW TO CUSTOMIZE YOUR 9-1-1 SIMULATION SOFTWARE

ADDRESSING

The simulator can be customized before delivery or after. We can assist with Join.Me training or by following this guide.

In order to create the most realistic setting for your learning simulation you will want to create ALI addressing for residential and business that matches your vicinity or your own locale.

ALI Anytown is DEFAULT in your program and can be used as is or replaced at any time by creating your own ALI (99 addresses) in ACCESS. ALI.mdb *will need to be uploaded* into your Computer/C:/Program Files/ARTTCOMMS folder to replace the current ALI.mdb.

The easiest way to create your own ALI.mdb is to use the Current ALI located in your Simulation Folder / Custom / ALI on your desktop and remake it by copying and pasting your addresses over ANYTOWN. Do not change the field names and all entries start with 0 and must be numbered.

Longitude and Latitude are mandatory for PLUS and not needed for BASIC model. RESD and BUSN are the only class - BUSN does not populate the caller info and RESD does. CELL acts as BUSN but isn't necessary. You will be working in Microsoft ACCESS.

No	PhoneNo	Name	Address	Town	ZipCode	Class	Latitude	Longitude	PremiseHX	Flags
0	No Record	No Record	No Record	No Record	00000	CELL	Unknown	Unknown		
1	No Record	No Record	No Record	No Record	00000	UNK	0	0		
2	(328) 555-1856	City Hall	25 W Main St	Anytown		BUSN	47.3074973	-122.23058		
3	(328) 555-9588	Childrens Theatre	122 W Mail St	Anytown		BUSN	47.3071611	-122.23156	PayPhone Lby	
4	(328) 555-2856	Hardware Store	308 W Main St	Anytown		BUSN	47.3074339	-122.23342		
5	(328) 555-0466	WalMart	762 Supermall Way	Anytown		BUSN	47.3015846	-122.24085		
6	(328) 555-1286	Hi School	711 E Mail St	Anytown		BUSN	47.3098491	-122.21960	PayPhone Hall	
7	(328) 555-4486	Red Lotus Bar	714 Auburn Way N	Anytown		BUSN	47.3137118	-122.22446		
8	(328) 555-3664	Medical Clinic	701 A St NE	Anytown		BUSN	47.313496	-122.22279		Haz Chem
9	(328) 555-3664	Veteran Park	405 E Street NE	Anytown		BUSN	47.313496	-122.22279		
10	(328) 555-3664	Shipping Supplies	1005 C St NW	Anytown		BUSN	47.313496	-122.22279		
11	(328) 555-3521	Airport	506 23rd St NE	Anytown		BUSN	47.3281560	-122.23559		
12	(328) 555-3521	Sports Bar	2802 Auburn Way N	Anytown		BUSN	47.3321990	-122.22075		
13	(328) 555-3521	Medical Clinic	1101 Outlet Collection Dr SW	Anytown		BUSN	47.3009345	-122.24463		
14	(328) 555-3544	The River Emergency Phone	Riverside	Anytown		BUSN	47.3397436	-122.21424

17	(328) 555-5688	Szavior Persma	404 M St SE	Anytown		RESD	47.3097392	-122.21415	DV Prior	OfcThreats
18	(328) 555-9589	Race Track	2300 Emerald Downs Dr	Anytown		BUSN	47.329859	-122.23861		
19	(328) 555-4488	Lowes	1232 A St NE	Anytown		BUSN	47.319561	-122.22784		
20	(328) 555-1886	Doxon Car Dealership	3405 Auburn Way N	Anytown		BUSN	47.3380035	-122.22278		
21	(328) 555-3665	Childrens Home Society	4338 Auburn Way N	Anytown		BUSN	47.346029	-122.22106		
22	(328) 555-3443	Sound Mental Health	4238 Auburn Way N	Anytown		BUSN	47.345477	-122.2216		
23	(328) 555-7112	Fed Ex	3702 C St NE	Anytown		BUSN	47.341377	-122.2250		
24	(328) 555-1789	Brodrick Leplace	3001 K St NE	Anytown		RESD	47.333977	-122.2165	Vac Watch	
25	(328) 555-0093	Jim & Julia Bohansen	3005 I St NE	Anytown		RESD	47.334472	-122.2191	Deaf	
26	(328) 555-0234	J. Jerison	5010 S 288th St.	Anytown		RESD	47.342976	-122.2713	Spanish	
27	(328) 555-2489	Beiret Chemical Plant 1	6870 S 277th St	Anytown		BUSN	47.350013	-122.2493		

When you have the C://Program Files/ARTTCOMMS folder open, simply replace the existing ALI.mdb with your NEW ALI.mdb – your new file must be named exactly **ALI.mdb** to be recognized by 911 Reality Software.

COMMON ERRORS:

1. Missing number 1- 99
2. Phone number not unique
3. Field Name changed or added
4. Long/Lat too long or too short (Plus only)

IMPORTANT Your custom ALI must be saved for reinstall with a new 'build' or upgrade. After installing the new build drag your custom ALI.mdb into the same folder in ARTTCOMMS.

USING THE 'SIMULATOR DATABASE MANAGER'

This exe program was designed for 911 Reality to allow the administrator to easily change addressing or call type or units. This exe program is found in a folder on your desktop called customization and in your programs menu under 911Trainer.

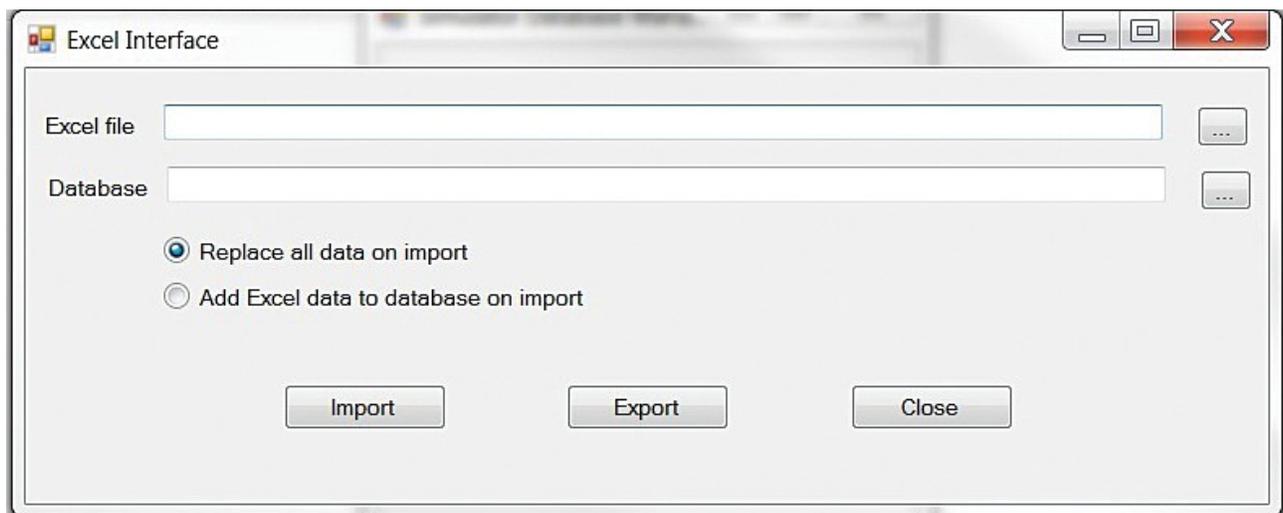

- 1) Import new ALI Database using Excel Template.
- 2) Edit Current ALI Database - will open current ALI.mdb
- 3) Edit Types & Unit Names (call types and unit names changed in minutes) and/or upload xls new database from template.

PROGRAM LOCATION

Simulator Database Manager is located on desktop Simulation How To / Customizing folder

1) IMPORT NEW ALI DATABASE

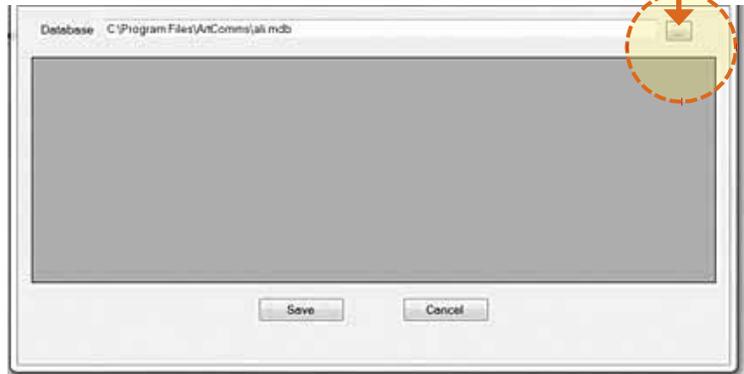

When you receive your program you will have ANYTOWN addressing (unless you provided the ALI to us to load for you). You can import from EXCEL up to 99 addresses using this exe program or add to the existing program. It is mandatory to use the template.

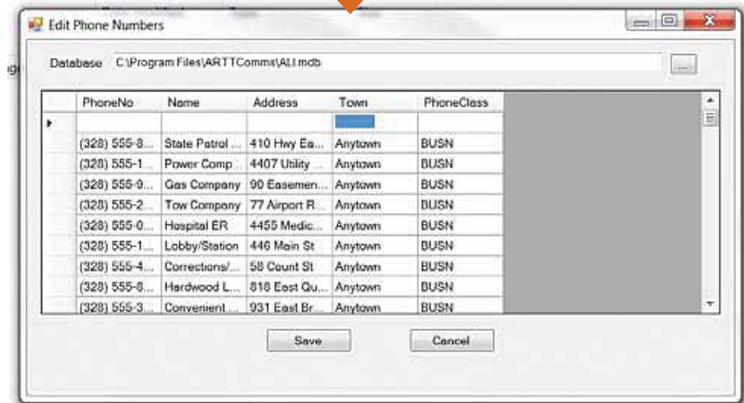

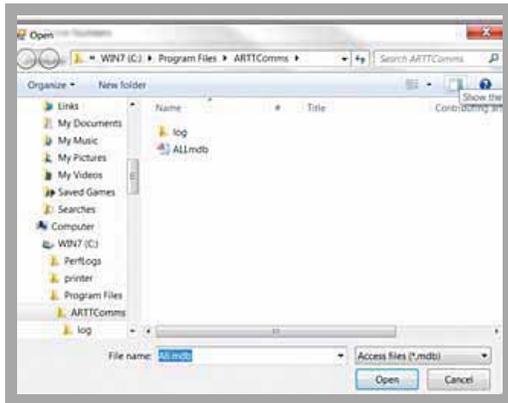

Replace? To put a full NEW database from EXCEL you select the Replace button as shown then use **search** to find the 1) EXCEL file program you have (possibly on your flash drive) and the 2) Database is the current database (in ARTTCOMM folder named ALI.mdb). Import!

Add? To put *more* data to the existing file use this second button and go through the same procedure to find and add with Import.

2) EDIT CURRENT? Whatever ALI addressing is currently showing up on your Instructor station can be edited easily. Open the Edit feature and use the search button.

This search will lead you to the file you need to open called ALI.mdb. When you select the ALI.mdb file it will dump the current ALI into the program as seen here.

Now you can go into this file and change any mistakes or add new addressing up to 999 and simply hit SAVE and this will load onto your Instructor Station. The simulation screen must be off for the changes to take place.

NOTE: ALI only needs to change on the Instructor / Administrator station – not the student station.

3. EDIT TYPES AND UNIT NAMES

Your training experience must be as realistic as possible for your learners, therefore 911 Reality expects that you will use Call Types / Codes / Descriptors that are unique to your agency, CAD or jurisdiction.

We also recognize that you may want to change the Call Types depending on what you are training that day; police, fire or EMD.

Unit names can be RESPONSES instead of individual units. For example One Patrol, Two Patrol, Full Fire Response, ALS, BLS.

NOTE: Changes to the Unit & Call Types must also be changed on the STUDENT station. Call Types change must begin on the INSTRUCTOR station.

Go to each trainee station to the Documents / Simulation Database Manager and change as you did on the instructor station.

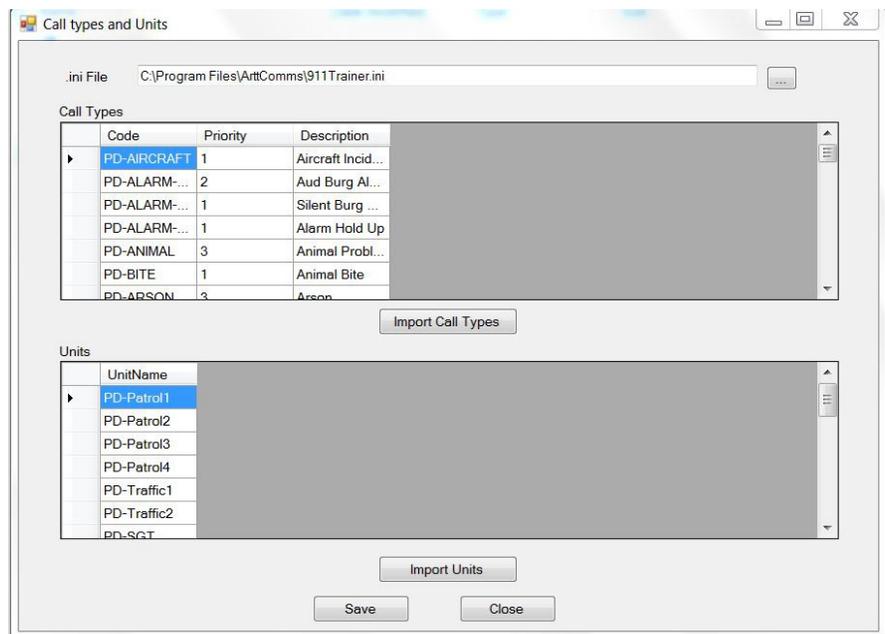

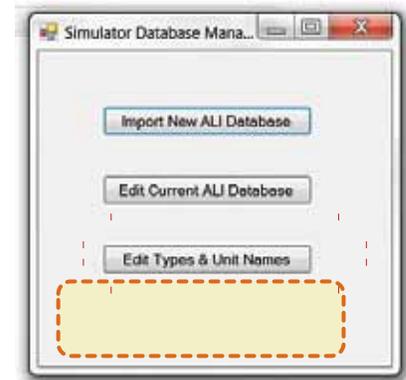

MULTIPLE UNITS GREAT TRAINING IDEA — If you have one Instructor and multiple students you are able to easily set up each station as a different responder type by entering their own Unit Names. For example One Instructor giving the call to 4 students, one of which is the call taker, one the fire dispatcher, one the police dispatcher, and one the call taker. All can hear the call, all can enter and dispatch according to their duty.

The Simulation Database Manager is placed on all student stations however is only used to change UNIT NAMES and CALL TYPES not ALI.

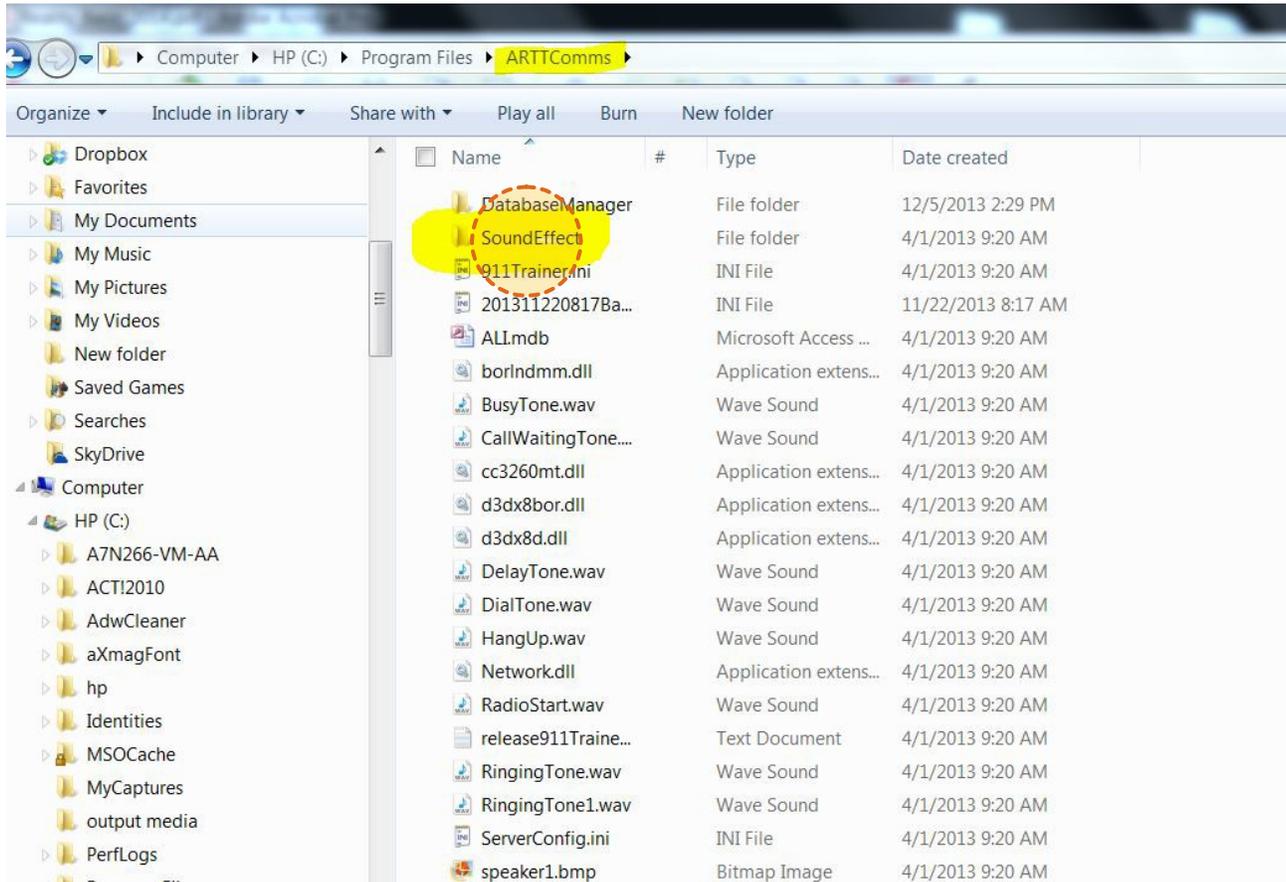

CHANGING CALL TYPES

From the Instructor station use the Import Call Types feature or edit the current. You can import a file from EXCEL Template in the Customizing folder. Use this feature if you have a great quantity. Or you can type the Call Types individually in from the edit feature in the Simulation Database Manager.

Unit names can be typed in and changed daily or whenever you wish to simulate a different squad, shift or type of responder... and can be changed for all from the instructor station or individually by going to each student station to change UNITS only.

In the ARTTComms folder in Program Files C: You will find a folder with all the sound effects. This is the same folder as the ALI.mdb. Other than that please do not change anything in this folder or your program will not work.

Simply open the folder and copy and paste or drag and drop your new wav sounds. When saved they will show up on your Instructor station after rebooting. You can load 911 calls if they are wav and edited to be brief.

If a sound effect drags in sound or is distorted delete it or shorten it.

CHANGING THE LABELS ON THE UTILITY PHONE LINES

The 911Trainer.ini file is where you will go to change the Ring Down Lines. This is located on the Desktop Simulation How to / CUSTOMIZE /Change ring down lines - on the Instructor Station and holds all the information on the system. Use caution when entering these files. There is a backup.ini in the event you do cause harm.

Open the **911Trainer.ini** - use Wordpad. Use Search / Find and type in GAS or State Patrol- this will find the correct location. Change the desired labels to what you want. Use caution to follow exactly the way it is - with no space between the = and the name you wish to enter. SAVE and reboot to see changes.
